## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 27, 2006 has been entered.

### ***Specification***

2. The amendment filed July 27, 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure, is as follows: the newly underlined lines on page 2, between lines 13 and 14 and on page 5, line 24.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wittmann (5,667,737) in view of Sugiyama '010. Wittmann '737 discloses an article

Art Unit: 3728

of footwear comprising a sole and a shell of composite structure at least in selected locations other than the sole, the composite structure being formed of first layer and a second layer laid over and inseparably coupled with said first layer at respective interfacing surfaces, said first and second layers being made of materials having different mechanical properties and are provided with mutually interfacing layers that remain inseparably adhering together, while the outermost and innermost surfaces of the shell are uniform and substantially smooth. See figures 2-4 embodiments and column 3, lines 44-47. Wittmann '737 discloses that the different synthetic resin materials are interconnected in overlapping transition areas shaped to fit each other i.e. having complementary configurations. Wittmann '737 does not appear to teach the shape of the interconnected overlapping transition areas having ribs intersecting each other so as to form a sort of truss-like pattern. Sugiyama '010 discloses a footwear assembly made up of a hard elastic layer and a soft elastic layer having intersecting complementary ribs forming a truss-like pattern on the overlapping transition areas for better bonding of the two layers. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to shape the transition areas of Wittmann '737 with ribs as taught by Sugiyama '010 for better bonding of the two layers.

With respect to claim 2, see column 4, lines 1-8.

With respect to claims 5 and 6, see column 3, lines 44-58.

With respect to claims 9 and 10, see column 2, lines 12-17.

***Response to Arguments***

5. Applicant's arguments filed January 13, 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Contrary to applicant's arguments Sugiyama discloses ribs for better bonding and stiffening of the footwear.
